↳ classes

↳ class 1

10

TCs

[MAVEN Surefire plugin] MAVEN Project

pom.xml

↓  
Run

[plugin / extension →

1. clean → { Build1 → FAIL  
Build2 - PASS , Build3 - FAIL , Build4 - PASS }
2. install → installed some pending libs/jars / generate Build
3. Test → executes only TCs, will not generate Build
- ③ Execute TCs

Right Click on pom.xml → Maven Build

↳ Goal

clean install ①  
test ③  
clean test ②

Run Maven Project using cmd : <https://maven.apache.org/download.cgi>

1. Download Maven Binary zip file

2. Set the Env. Variables  
3. check whether path of maven is set or not  
4. create Maven project using cmd
- in cmd Run Command  
[mvn -version]
- [mvn archetype:generate]

D:\2021\Batches\_DATA\SDet\_0402\LearnSel\_0402\apache-maven-3.8.2\bin

Paste the path in Env. Variables → System Variable → path.

(1) Check maven version → `[mvn -version]`

(2) Create Maven project → `[mvn archetype:generate]`

(3) Project created  
using cmd

Edit/  
Run this  
code in  
Eclipse

src/main/java  
src/test/java  
pom.xml

Eclipse Project

{ → .classpath }  
→ .project }

To make Maven project  
compatible to eclipse - run command } `[mvn eclipse:eclipse]`

(4) Import create Maven project through cmd, into Eclipse.

Steps → In eclipse, click on Import → Maven →

Existing maven project → Browser → choose

Maven project (after opening it).

(5) Run the pom.xml using cmd.

→ Run Command → mvn clean } mvn clean install  
→ mvn test  
→ mvn install

# Alert Handling → JS Alerts

Alert → used to display validation Error Msg

↳ alert()  
↳ confirm()  
↳ prompt()

JS Alert (can't inspect)

Msg  
OK Button

[ Simple  
Alert

Confirm  
Alert Box

Msg  
OK | CANCEL

Prompt Box

↓  
Msg  
Text Field  
OK | CANCEL

Alert (I) `alt = driver.switchTo().alert();`

↳ `accept()` → for 'OK' button

↳ `dismiss()` → for 'Cancel' button → Confirms

↳ `sendKeys()` → for Text Field in prompt

↳ `getText()` → get Msg. Text
